

Core Functionality

1. Basic Log In and sign up up and running with connection to Google App Engine.
2. Expenses can be recorded and saved on server.
3. Debts can be managed by connecting two accounts.
4. After Log in, financial manager works offline, via NSCodering.
5. SideBar menu up and running, linking to every page.
6. Pie Chart representation of expenditure and earnings.

All these elements are organized using a custom layout designed in-house.

NOTE: Some pages take a slower time to load initially. We are going to look into for the reasons.
